MUHAMMAD SHAHEER

Ó +92 337 5482905 muhammadshaheerdev91@gmail.com LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Developer specializing in scalable web applications and secure backend architectures. Skilled in building high-performance applications using modern technologies, with expertise in authentication, API design, and system scalability. A quick learner and passionate technology enthusiast who enjoys solving complex problems, continuously learning new technologies, and transforming ideas into structured, production-ready solutions that deliver real-world impact.

EDUCATION

Kohat University of Science and Technology **2022 – 2026**

Bachelor of Science in Computer Science *Kohat*

CGPA: 3.67/4.00

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python (Fundamentals)
- **Front End Development:** React.js, Next.js, Tailwind CSS
- **Backend Development:** Node.js, Express.js
- **API Development:** RESTful APIs, API Integration
- **Authentication & Security:** JWT Authentication, Role-Based Access Control
- **Database Management:** MongoDB, MySQL
- **Development Tools:** GitHub, Git, VS Code, Postman
- **Operating System:** Linux (Ubuntu - Basic), Windows
- **Architecture Focus:** Scalable Systems, Clean Code Practices

EXPERIENCE

Dev-K System **Mar 2025 - Present**

Role – Backend Developer *Kohat, Pakistan*

Uzair Tech **Jun 2024 – Jan 2025**

Role – Intern *Kohat, Pakistan*

Kohat University of Science and Technology (KUST) **Sep 2025 – Jun 2026**

Role – Teacher Assistant *Kohat, Pakistan*

PROJECT

Nain's Brand POS System | Scalable Business Solution **2025**

- Independently developed a full-stack POS system for a real client under a one-month deadline.
- Designed system architecture to handle product management, sales processing, and transaction tracking.

- Built secure and structured APIs to manage business-critical data and workflows.
- Ensured real-time performance and reliability for daily operational use.
- Delivered a production-ready solution while managing time constraints and client expectations.

Secure Password Generator | Cyber Security **2024**

- Developed a secure web-based password generator with customizable password length and character selection.
- Implemented password generation using modern JavaScript and security-focused design principles.
- Added options for uppercase, lowercase, numbers, and special characters.
- Designed a responsive and intuitive interface for generating strong passwords.
- Improved usability with one-click password copy functionality.

REST API System | Backend Development **2024**

- Developed a RESTful API for handling structured data operations.
- Implemented CRUD functionality with validation and error handling.
- Designed scalable backend structure for maintainability.
- Tested and validated endpoints using Postman.

CERTIFICATIONS

- Dev-K System Kohat
- Cybersecurity for Everyone (University of Maryland, College Park)
