SUMMARY

Full Stack Developer specializing in scalable web systems and secure backend architectures. Skilled in building highperformance applications using modern technologies, with a focus on authentication, API design, and system scalability. Known for transforming complex ideas into structured, production-ready solutions that deliver real-world impact.

EDUCATION

Kohat University of Science and Technology **2022 – 2026**

BS – Computer Science - CGPA - 3.63 *Kohat*

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python(Basics)
- **Front End Development:** React.js, Next.js, Tailwind CSS
- **Backend Development:** Node.js, Express.js
- **API Development:** RESTful APIs, API Integration
- **Authentication & Security:** JWT Authentication, Role-Based Access Control
- **Database Management:** MongoDB, MySQL
- **Development Tools:** VS Code, Postman
- **Version Control:** GitHub, Git
- **Architecture Focus:** Scalable Systems, Clean Code Practices

EXPERIENCE

Dev-K System **Mar 2025 - Present**

Role – Backend Developer *Kohat, Pakistan*

Uzair Tech **Jun 2024 – Jan 2025**

Role - Internee *Kohat, Pakistan*

PROJECTS

Nain's Brand POS System | Scalable Business Solution **2025**

- Independently developed a full-stack POS system for a real client under a one-month deadline.
- Designed system architecture to handle product management, sales processing, and transaction tracking.
- Built secure and structured APIs to manage business-critical data and workflows.
- Ensured real-time performance and reliability for daily operational use.
- Delivered a production-ready solution while managing time constraints and client expectations.

Developer Portfolio | My Portfolio **2026**

- Designed and developed a modern developer portfolio using Next.js and Tailwind CSS.
- Built reusable and scalable UI components for maintainable architecture.
- Implemented responsive design and optimized performance for smooth user experience.
- Structured the project to reflect real-world development practices and system thinking.
- Showcases projects, skills, and development approach in a clean, professional layout.

REST API System | Backend Development **2024**

- Developed a RESTful API for handling structured data operations.
- Implemented CRUD functionality with validation and error handling.
- Designed scalable backend structure for maintainability.
- Tested and validated endpoints using Postman.

CERTIFICATIONS

- Dev-K System Kohat
- Cybersecurity for Everyone (University of Maryland, College Park)
